

Pest Control for Government Properties: It's Easy to Get the Best

As a GSA-approved government business partner, Orkin is the provider of choice for thousands of federal, state and local government locations across North America. Whether you're a court house, a national park, a seaport or a massive government office complex, here are **five simple reasons** Orkin makes it easy to get the best:

- 1 SECURE** Orkin's Pest Specialists are screened and randomly drug tested, so you can have complete confidence in The Orkin Man™.
- 2 EXPERIENCED** After more than a century in business, there is almost no environment we haven't worked in, or pest problem we haven't encountered.
- 3 RELIABLE** Scheduled service when you need it, provided by the best-trained pest specialists in the industry, so the job will be done right. If you need us between service visits, we're there within 24 hours, guaranteed.
- 4 COMPLIANT** From OSHA to IPM, Orkin is already familiar with your compliance requirements and well-versed in all the activities and paperwork required to meet them.
- 5 WELL-DOCUMENTED** Our PowerTrak™ system gives you real-time service data and reports via an online database that you can access anytime, anywhere.

Orkin's A.I.M.™ approach to **Integrated Pest Management** (IPM) is a collaborative and ongoing cycle of three critical activities that help keep pests in their place:

Assess the situation

Implement a customized solution

Monitor, document and communicate

COMMERCIAL SERVICES

In addition to Orkin's standard Integrated Pest Management (IPM) service, Orkin offers a variety of specialized services for government properties using the **latest technologies** and the **best trained professionals** in our industry.

Bed Bug control If you suspect a bed bug infestation, our aggressive bed bug treatment strategy includes a comprehensive inspection and treatment of both infested and potentially infested areas. Orkin will conduct a follow-up inspection to make sure the treatment was successful.

Bird control Orkin can customize a bird control program focusing on habitat modification, helping to make your facility unattractive to problematic birds.

Fly control Orkin can develop a strategic fly plan specifically for your property, utilizing treatment components such as light traps, baiting, chemical controls and exclusion to help control fly infestations.

Exclusion Pests can enter your property through doors and small cracks. Rats can enter a building through a hole as small as a quarter, and mice can enter through a hole as small as a dime. Orkin seals the gaps to help keep pests in their place.

Mosquito control Orkin's mosquito service is proven to help suppress current and future mosquito activity around your property.

Termite control Orkin's customized termite treatments provide ongoing protection to address any current termite activity and help prevent further infestations.

Sanitation Orkin's OE-30 program uses naturally occurring enzymes and bacteria to break down grease and grime buildup in drains without chemicals that may pose environmental health threats.

Restroom care A clean facility is less attractive to pests and creates a healthier environment for employees and visitors. Orkin's restroom care portfolio provides three core products designed to help with sanitation - AutoFresh, AutoFlush and AutoClean.
