

Orkin's PowerTrak™ System

Effective Pest Management Technology for Your Business

Tracking and documenting your pest management services has never been easier. PowerTrak™ captures service information faster and offers secured centralized reporting, making it a convenient way to review services that were performed at every property. Using Orkin's unique pest monitoring software, service information is captured on the hand-held device by scanning discretely placed barcodes in designated areas throughout your facility. Your service data is stored and managed in a secured central database for easy, online access to pertinent information such as:

- services performed
- pest activity and trends
- structural, storage and sanitation issues and recommendations
- pesticide usage log
- interactive hierarchy reports for your staff

THE BENEFITS OF POWERTRAK™

By helping your Orkin Commercial Pest Specialist analyze pest data faster and see trends more quickly, the application also helps identify areas for targeted treatment, addressing pest problems before they become widespread – with detailed documentation.

COMMERCIAL SERVICES

Targeted Treatment

PowerTrak™ assists your Orkin Commercial Pest Specialist in identifying the location and nature of pest problems, allowing for timely corrective action.

Secure and Central Database

PowerTrak™ stores service information in a central database for easy, anytime access. It's simple to track multiple facilities and any potential conducive conditions that could cause pests to enter your facility.

Customized Reporting

PowerTrak™ generates on-demand reports to deliver the pest management information you need, when you need it.

**For effective and conscientious pest management,
