

ORKIN ODOR CONTROL PROGRAM

SOLUTIONS FOR YOUR BUSINESS

Odors are an unseen deterrent to your business. They can penetrate your atmosphere, bringing unpleasant smells and the unwanted pests they attract to your establishment – often resulting in a loss of business and repeat customers.

NO BUSINESS IS IMMUNE. Regardless of sanitation practices, odors can originate from hundreds of sources – many of which are outside your control – and appear almost anywhere. Even if you can't smell an odor, our research shows that pests can.

ODORS CAN BE PERSISTENT. Odors with an organic base tend to be very persistent, and unless they are treated properly can remain long after the source has been removed.

For your business, atmosphere is everything. Orkin offers three odor control solutions to help keep your atmosphere smelling clean.

ORKIN AUTOFRESH

A fresh-smelling restroom speaks well of your business, helping minimize complaints and the loss of repeat customers. Orkin AutoFresh provides highly efficient odor control by automatically dispensing precise neutralizing fragrances to help create a pleasant bathroom environment. Orkin AutoFresh can also be used in mop rooms, supply areas or other locations around your business needing odor control.

HOW IT WORKS

Orkin AutoFresh uses a Microtrans odor neutralizer to break down large malodorous molecules into smaller, odor-neutral molecules, allowing our fresh, clean fragrances to permeate the room.

EVEN IF YOU CAN'T SMELL AN ODOR, OUR RESEARCH SHOWS THAT PESTS CAN.

ORKIN ODOR CONTROL PROGRAM

SOLUTIONS FOR YOUR BUSINESS

AROMABEAM™

Designed for large spaces, AromaBeam uses dry vapor technology to freshen air and tamper odors without using liquids or sprays. The scent-diffusing system effectively freshens interior spaces up to 50,000 cubic feet.

Orkin offers five Scentsia™ fragrances to create a customized ambiance for your entire business, or just a specific area. AromaBeam provides multiple mounting options to help your odor control program remain inconspicuous.

Fragrance levels and time intervals are easily controlled through your smart phone with the Scent Bridge app for Android and iOS.

ORKIN ACTIZYME® ODOR NEUTRALIZER

Our proprietary, all-natural and nontoxic formula safely and effectively alters odor-producing molecules. Unlike a perfume or air freshener, Actizyme Odor Neutralizer eliminates odors right at the source rather than masking them temporarily, helping to create a pleasant environment for your customers and staff – not for pests. It can be used in both indoor and outdoor dumpsters and even in trash chutes within your walls.

ODOR CONTROL APPROACH

- **INSPECTION** On the initial visit, your Orkin Commercial Pest Specialist will conduct a comprehensive site survey to determine the source(s) of your odor problem.
- **SANITATION** We will recommend a sanitation program that helps keep key areas free of unpleasant odors.
- **INSTALLATION** Orkin will install the appropriate odor control technology for your business.
- **ONGOING MONITORING AND MAINTENANCE** Your Orkin Commercial Pest Specialist will continue to monitor and adjust your treatment program as necessary. This includes ongoing inspections with replacement of batteries and Orkin AutoFresh or Scentsia fragrance refills.

PEST CONTROL DOWN TO A SCIENCE.™

Let our odor control formula protect your atmosphere.
