

I SPY A BED BUG

ACTIVITY SHEET

Bed bugs are tiny, apple seed-sized creatures that feed on blood. Their small, flat bodies help them enter your home easily and fit into tiny spaces, so it's important to know some of their favorite hiding places. In the image below, hunt for the bed bugs (by looking for groups of tiny black dots) and circle their hiding places. There are nine in all!

Remember: Don't let the bed bugs bite!
