

PEST CONTROL DOWN TO A SCIENCE.

### Pumpkin Carving Instructions

- 1.** Tape desired template to the front of upright pumpkin.
- 2.** Using a thumbtack, straight pin, or wooden pick, poke holes about every 1/8 to 1/4 inch along dotted lines; then remove template.
- 3.** Cut or scrape away the negative space (grey shaded sections) along pierced lines using pumpkin carving tools.
- 4.** To preserve carved pumpkin, place "front" side down in a tub of cold water and slowly fill pumpkin. Add a tiny bit of liquid bleach to water to prevent mold. Soak up to 8 hours or overnight and dry immediately. Rub petroleum jelly on cut edges to hold in the moisture.
